

Airway

Description

The goal of the rotation is to provide learning opportunities that will enable residents to develop skills required for care of the surgical patient.

Objectives

While on this rotation, residents will develop the following competencies:

Family Medicine Expert

Demonstrates an appropriate knowledge base to the level of training (ME1)

Able to perform an airway exam to identify areas of concerns (ME3)

Demonstrates the proper technique for mask ventilation (ME5)

Demonstrate the proper technique for direct laryngoscopy and intubation (ME5)

Correctly confirm endotracheal tube placement and secure for transport (ME5)

Describe potential complications of endotracheal intubation and appropriate management (ME5)

Describe alternate methods for establishing an airway when endotracheal intubation cannot be accomplished (ME5)

Correctly assess the adequacy of ventilation (ME5)

Correctly extubate (ME5)

Demonstrates an effective approach to advance care planning (PAL2)

Performs family medicine specialty-appropriate procedures to meet the needs of individual patients (ME5)

Resuscitation

oral airway insertion
emergency venous access
bag-and-mask ventilation
endotracheal intubation
cardiac defibrillation

Venous Access

peripheral intravenous line

GI procedures

Nasogastric insertion
Incision and drain thrombosed hemorrhoid

Breast

Aspirate breast cyst

Injections

Intramuscular injection
sub-cutaneous injection
lumbar puncture

Skin

Incision and drainage of abscess

Establishes patient-centered care plans that include the patient, their family, other health professionals and consultant physicians (ME6)

Communicator

Elicits and synthesizes accurate and relevant information from, and perspectives of, patients and their families (CM2)

Shares health care information and plans with patients and their families (CM3)

Documents and shares written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy (CM5)

Collaborator

Works effectively with others in a collaborative team model (CL1)

Recognizes and facilitates the necessary transitions in care with other colleagues in the health professions, including but not limited to shared care, and/or hand over care to enable continuity and safety (CL3)

Leader/Manager

Engages in the stewardship of health care resources (LD2)

Health Advocate

Respond to an individual patient's health needs by advocating with the patient within and beyond the clinical environment (HA1)

Scholar

Integrates best available evidence into practice with consideration given to context, epidemiology of disease, multi-morbidity, and complexity of patients (SC2)

Professional

Demonstrates a commitment to patients through clinical excellence and high ethical standards (PR1)

Demonstrates a commitment to society by recognizing and responding to societal expectations in health care (PR2)

Demonstrates a commitment to reflective practice (PR5)

Entrustable Professional Activities

F3: Facilitates and manages care transitions

C1: Assess, manage, and follow up adults presenting with undifferentiated symptoms and common (key) conditions

C6: Provide palliative and end-of-life care

C7: Perform common family medicine procedures

C8: Provide expert advice and obtain consultation for patients

C10: Determine when a patient requires admission and in-patient hospital care

C11: Assess and appropriately manage medical patients in hospital

C12: Recognize and provide initial management of medically unstable patients in the hospital

Evaluation

- Field notes
- In-training Assessment Report (ITAR)
