

Ambulatory Pediatrics

Description

The goal of the Pediatric Ambulatory rotation is to provide learning opportunities that will enable residents to develop skills required for preventative and episodic care of children and adolescents.

Objectives

While on this rotation, residents will develop the following competencies:

Family Medicine Expert

Provide periodic health exams and preventive care to infants, children (ME2/COC3)

Provide periodic health exams and preventive care to adolescents (ME2/COC4)

Perform patient-centered clinical assessment and manage children and adolescents presenting with common (key) conditions (ME3/COC5)

Diagnose, and manage key pediatric mental health issues (ME3/COC6)

Communication

Elicits and synthesizes accurate and relevant information from, and perspectives of, patients and their families (CM2)

Shares health care information and plans with patients and their families (CM3)

Documents and shares written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy (CM5)

Collaborator

Works effectively with others in a collaborative team model (CL1)

Recognizes and facilitates the necessary transitions in care with other colleagues in the health professions, including but not limited to shared care, and/or hand over care to enable continuity and safety (CL3)

Leader/Manager

Engages in the stewardship of health care resources (LD2)

Health Advocate

Respond to an individual patient's health needs by advocating with the patient within and beyond the clinical environment (HA1)

Scholar

Integrates best available evidence into practice with consideration given to context, epidemiology of disease, multi-morbidity, and complexity of patients (SC2)

Professional

Demonstrates a commitment to patients through clinical excellence and high ethical standards (PR1)

Demonstrates a commitment to society by recognizing and responding to societal expectations in health care (PR2)

Demonstrates a commitment to reflective practice (PR5)

Entrustable Professional Activities

- F2: Provide recommended preventative care to infants, children, adolescents
- F3: Facilitates and manages care transitions
- C3: Assess, manage, and follow-up children presenting with undifferentiated / common (key) conditions
- C5: Identify, diagnose, evaluate and manage patients with common mental health issues
- C7: Perform common family medicine procedures
- C8: Provide expert advice and obtain consultation for patients

Evaluation

- Field notes
- In-training Assessment Report (ITAR)
