

## Pediatric Inpatient

### Description

The goal of the Pediatric Inpatient rotation is to provide learning opportunities that will enable residents to develop skills required for the care the hospitalized child or adolescent.

### Objectives

While on this rotation, residents will develop the following competencies:

#### Family Medicine Expert

Performs patient-centered clinical assessment and manages children and adolescents presenting with common (key) conditions (ME3/COC5)

Diagnoses, and manages key pediatric mental health issues (COC6).

Recognize and appropriately respond to emergent conditions in children and adolescents (COC7)

Performs family medicine specialty-appropriate procedures to meet the needs of individual patients (ME5)

#### Resuscitation

oral airway insertion  
emergency venous access  
bag-and-mask ventilation  
endotracheal intubation  
cardiac debrillation

#### Venous Access

peripheral intravenous line  
peripheral venous access child

#### Injections

Intramuscular injection  
sub-cutaneous injection  
lumbar puncture

#### Communication

Elicits and synthesizes accurate and relevant information from, and perspectives of, patients and their families (CM2)

Shares health care information and plans with patients and their families (CM3)

Documents and shares written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy (CM5)

#### Collaborator

Works effectively with others in a collaborative team model (CL1)

Recognizes and facilitates the necessary transitions in care with other colleagues in the health professions, including but not limited to shared care, and/or hand over care to enable continuity and safety (CL3)

#### Leader/Manager

Engages in the stewardship of health care resources (LD2)

### **Health Advocate**

Respond to an individual patient's health needs by advocating with the patient within and beyond the clinical environment (HA1)

### **Scholar**

Integrates best available evidence into practice with consideration given to context, epidemiology of disease, multi-morbidity, and complexity of patients (SC2)

### **Professional**

Demonstrates a commitment to patients through clinical excellence and high ethical standards (PR1)

Demonstrates a commitment to society by recognizing and responding to societal expectations in health care (PR2)

Demonstrates a commitment to reflective practice (PR5)

### **Entrustable Professional Activities**

- F2: Provide recommended preventative care to infants, children, adolescents
- F3: Facilitates and manages care transitions
- C3: Assess, manage, and follow-up children presenting with undifferentiated / common (key) conditions
- C7: Perform common family medicine procedures
- C8: Provide expert advice and obtain consultation for patients
- C10: Determine when a patient requires admission and in-patient hospital care
- C11. Assess and appropriately manage medical patients in hospital
- C12. Recognize and provide initial management of medically unstable patients in the hospital setting
- C17. Provide care to vulnerable and underserved populations
- C18. Provide care to First Nations, Inuit, and Métis peoples

### **Evaluation**

- Field notes
- In-training Assessment Report (ITAR)
