Dr. Alexander Singer, MB BCh BAO, CCFP
Associate Professor
Director, Research and Quality Improvement
Department of Family Medicine
Rady Faculty of Health Sciences, University of Manitoba

Dr. Ilan Rubinchik, MD, PGY 1
Family Medicine Kildonan Medical Centre
Max Rady College of Medicine,
Rady Faculty of Health Sciences,
University of Manitoba

Objectives:

1. Recognize drivers of climate change, global projections, and targets to minimize the impact of climate change.
2. Recognize the direct health impacts of climate change related weather events expected in Manitoba (e.g. wildfires, effects on clean water and flooding) and other rapid ecosystem changes.
3. Recognize the downstream effects of climate change and their indirect health impacts due to changes in infectious disease patterns (e.g. Lyme disease, malaria), air pollution, food insecurity, poverty and mental illness).
4. Consider what Family doctors can do to mitigate and address climate change related health impacts.
5. Advocate for local, regional, and national strategies that will reduce greenhouse gas admissions and/or mitigate the impacts of climate change.
6. Advocate for strategies to reduce the negative impact of healthcare provision on the environment.

**This event was co-developed with the CPD Medicine Program, University of Manitoba and was planned to achieve scientific integrity, objectivity and balance.*

This one-credit-per-hour Group Learning program meets the certification criteria of the College of Family Physicians of Canada and has been approved by the CPD Medicine Program, University of Manitoba for up to 1.0 Mainpro+ credits. Participants should only claim credit for the actual number of hours attended. The University of Manitoba CPD Medicine Program is fully accredited by the Committee on Accreditation of Continuing Medical Education (CACME).
