

Transgender Health Curriculum Objectives

1. Learn the appropriate and safe use of language and pronouns with respect to the care of transgender and gender diverse patients.
2. Understand the diagnosis of gender dysphoria.
3. Assist a patient who requires gender-affirming care, based on best practices and a patient's individualized goals.
4. Counsel patients appropriately on hormone therapy.
5. Initiate and continue hormone therapy when appropriate to do so.
6. Describe common gender-affirming surgeries and understand referral pathways.
7. Provide appropriate primary and preventative care for transgender and gender diverse patients.
