Subject: Re: Physician Assistant Opportunity – Form Medical Aesthetics

—
I am a family physician with focused areas of practice in dermatology, medical aesthetics, gender affirming care, and office-based procedures. My work is consult based, and I do not carry a traditional family practice. This role offers a unique opportunity to build a dynamic and varied clinical experience. My primary workplace is Form Medical Aesthetics in Winnipeg. I also participate in rural skin cancer screening clinics, which may be incorporated depending on the structure of the role.

The position can be structured in one of two ways:

Option 1

Full time across all sites, including:

Winnipeg based practice at Form Medical Aesthetics

Participation in rural skin cancer screening and consult clinics

Option 2

Full time Winnipeg based role, split between:

My practice, with exposure to dermatology, medical aesthetics, gender affirming care, and procedures

A collaborating physician with a focus in gynecology and menopause care

Across both options, the role offers:

Exposure to both medical and aesthetic practice environments

Work within a collaborative, multidisciplinary team

Opportunities to develop procedural and clinical skills in a supported setting

We are looking for someone interested in a long-term fit, who wants to grow with the clinic, develop their skills, and contribute meaningfully to an evolving practice.

Thanks so much!

Form
